AI Product Portfolio

AuditMind | AI-powered Audit Workflow Platform

Designed and developed an AI audit workflow MVP based on real-world audit scenarios. Conducted requirement analysis, product design, and workflow design for core modules including AI-assisted document extraction, audit workspace, and RAG knowledge base.

Integrated DeepSeek API with citation-based traceability, insufficient-information alerts, and local-first architecture to improve AI reliability and reduce hallucination and data privacy risks.

YouTube Competitor Analysis Tool | Overseas Content Growth Analytics

Designed and developed a competitor analysis tool to automate overseas content research.

Integrated YouTube Data API and subtitle APIs to collect, clean, visualize, and export video data, supporting content strategy, competitor benchmarking, and growth analysis.

Reddit User Insight Tool | Overseas User Research Automation

Developed an automated user research tool to analyze overseas community insights.

Built Playwright-based workflows for public community data collection, supporting content filtering, deduplication, visualization preview, and CSV export for product research and market analysis.

AI Technology Stack: LLM API | RAG | Prompt Engineering | AI Coding | Python | Pandas | Streamlit | Playwright

Professional Experience

Dec 2023 – Present Langfang Ruitai Certified Public Accountants Co., Ltd. Audit Associate

- Conducted financial audits, tax audits, and special audit projects, independently performing procedures including voucher testing, confirmations, account reconciliation, fixed asset verification, and bad debt testing.
- Participated in internal control audits, government debt compliance audits, and performance evaluations by reviewing business processes including budgeting, procurement, contracts, and asset management.
- Collaborated with finance teams and government organizations to identify process risks, track remediation progress, and contribute to the development of internal control process documentation.
- Identified repetitive audit workflows and onboarding challenges through hands-on audit experience, leading to the design of AuditMind to transform audit knowledge into reusable AI workflows.

June 2020 – Nov 2022 Beijing iHandy Mobile Inc. Global Product Operations

- Managed overseas product operations and ASO optimization, Improving product visibility through keyword research, metadata optimization, screenshot updates, and competitor analysis. Supported app launches and version releases for 40+ domestic and overseas applications across major stores.
- Conducted competitor research, user analysis, and growth optimization initiatives, contributing to a 10%-20% increase in organic downloads in the US market.
- Created English marketing content, managed overseas social media channels, supported app store optimization, and handled platform compliance processes including app review issues and release management.
- Coordinated cross-functional teams across product, engineering, design, and operations to support global product launches and continuous iteration.

Education Background

Feb 2018 – Jul 2019 Australian National University Master of Applied Finance

Sep 2013 – Jul 2017 Yanbian University (211 University, China) Bachelor of Economics

Skills

- AI & Product Skills:** AI Application Design | Workflow Design | MVP Prototyping | Requirement Analysis | Competitor Research|Data Analysis
